

PCB Stack-up and Technical Requirements

Pages on this document: 2

Our minimum specifications are as follow:

Number of layers:	4 layers
Minimum line width (\leq):	4mil / 0,106mm
Minimum line spacing/gap (\leq):	4mil / 0,106mm
Minimum Annular Ring (\leq):	4mil / 0,106mm
Minimum mechanical hole size (\leq):	8mil / 0,2mm
Surface finish:	ENIG
Electrical Test:	100% Electrical Test (E-Test)
Substrate type:	FR-4 High Tg (\geq 170°C)

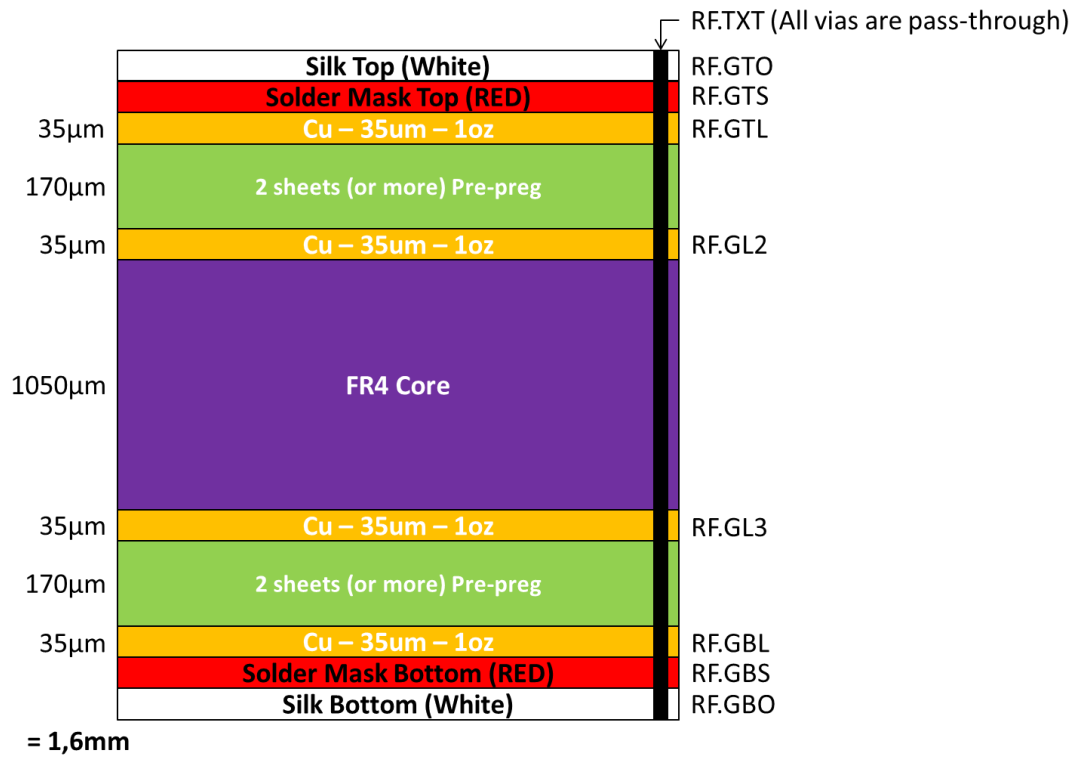

Stencil:

The global fiducials for the stencil are indicated on the top-left, bottom-left and bottom-right corners of the stencil files. **THE FIDUCIALS SHALL BE MADE EXACTLY LIKE THE PICTURE BELOW**. The stencil shall be made in **stainless steel** and **laser cut**. The fiducials shall be produced in order to ensure good alignment and many production cycles. **Thickness is 4 mils**.

Please manufacture 1 stencil (RF_STENCIL.TOP). The stencil should be **framed** and have a **frame size of 29"**.

PCB Stack-up and files:

Quantities:

- 1 x 29" framed stencil (RF_STENCIL.TOP)
- 3510 x PCBs (585 panels)
